Knock Tobacco Out of the Park - TFK

On Opening Day, Nearly Half of Major League Stadiums Will Be Tobacco-Free - MLB Cities Need to Finish the Job for Our Kids

Statement of Matthew L. Myers, President, Campaign for Tobacco-Free Kids

WASHINGTON, D.C. - When the 2017 Major League Baseball season opens in just a few days, more ballparks and games will be tobacco-free than ever before - and that's a terrific example for millions of young fans.

Nearly half the Major League stadiums (14 of 30) will be completely tobacco-free as a result of state and local laws. In addition, the new collective bargaining agreement (CBA) reached last year between players and owners prohibits new MLB players from using smokeless tobacco, like chew, dip and snuff. The agreement also makes violations of local tobacco-free stadium laws violations of the CBA as well, strengthening enforcement.

TPS/reACT Chronicles

Kick Butts Day in Wibaux

by Laureen Murphree, Dawson, Wibaux, & Prairie Counties

In Wibaux, they themed their Health Fair after Kick Butts Day. The reACT students helped with the Tobacco Free booth, helped the K-12 students and adults play corn hole with a visual impairment caused by tobacco.

The players spun the wheel to see what impairment they would play with. The reACT student would give them a pair of glasses with things blocked out

for macular degeneration, retinopathy, stroke, etc. and they would play the game with those glasses on. The whole gym was decorated with black and red balloons, KBD posters and many anti-tobacco posters. Mo the Moose and Ciggy Butts interacted with the students as well.

Tobacco Taxes

Community Education Opportunity

Community TPS know that increasing tobacco taxes is one of the most effective tobacco control interventions, but the public may not. To increase awareness of the importance of frequently increasing tobacco taxes and applying tax to e-cigarettes, MTUPP has created a Swiss Cheese Letter to the Editor which has been made available on [Asher Basecamp](#).

MTUPP highly encourages you to pass the Swiss Cheese LTE along to your **coalition members** for them to complete and submit to

local newspapers. Public voice on this matter is important. You will often find that **coalition members** and community supporters prefer this sort of sample letter that they can modify or personalize. Please have them complete the yellow items and change the title of the LTE before submitting. LTEs submitted by **coalition members** do NOT require liaison approval before publication.

Social Media

Some Social Media can really assist your Point of Sale Policy Education. This one is from Tobacco Free Kids

5.6 TRILLION cigarette butts are deposited into the global environment each year

Cigarette butts are NOT biodegradable.

The earth is your future, not your ashtray!

And April 22, 2017 is Earth Day. Shift your focus to help your community see how tobacco waste impacts our environment.

Inspirational Social Media of the Week

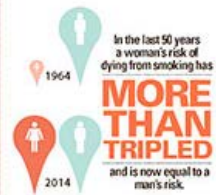

**EQUALITY
IN SMOKING
& DISEASE**
Nobody Wins!

Nearly
20 million
women and girls
in the United States
smoke cigarettes.

**DURING THE
60's and 70's**
TOBACCO COMPANIES
TARGETED WOMEN.

**WOMEN
WHO SMOKE ARE
MORE
LIKELY**
to die from COPD
than men who smoke.

**WOMEN
OVER AGE 35
WHO SMOKE**
have a slightly higher risk of
dying from heart disease than
men who smoke.

**MORE THAN
200,000
WOMEN DIE EVERY YEAR**
from smoking-related disease
compared with 270,000 men
who die from smoking-related
disease every year.

WOMEN SMOKERS SHOULD QUIT SMOKING.

For help, they can visit women.smokefree.gov or call 1-800-QUIT-NOW.
